## ABOUT EVERGREEN

Greenbridge division Evergreen was established in 1998 to recycle PET plastic bottles and provide a reliable supply of polyester resin for Greenbridge's portfolio of PET strapping. In 2021, a second recycling and rPET manufacturing operation in Riverside, California, was acquired, giving Evergreen a strong presence in the Midwest and West Coast markets. Today, Evergreen is among the nation's largest PET recyclers, processing more than a billion post-consumer PET bottles and producing over 80 million pounds of food grade rPET annually. Evergreen is a preferred supplier of food grade rPET pellets and flake to top global brands, helping customers increase recycled content in their packaging and meet sustainability goals.
